and relax or enjoy
yourself.*

Bio

I am a student in the engineering domain. Most of the time, I have a lot of work, but in my free time or holidays, I try to find an interesting activity to experience.

I enjoy traveling and discovering new things and places around the world. Usually, I go alone but I don't mind having company, either my friends, family, or new people that I meet on the go.

Apart from traveling, music plays a huge role in my activity. I love all genres of music, being interested in exploring new genres. Also, I am a big fan of music festivals, as I adore the feeling the live music gives me.

Core needs

I would like to be able to see a rank of the places with these criteria: cheapest, luxurious, waiting time, most comfortable.

I also need to see the ratings of the places and the reviews from the people that tried them to make an informed decision.

Regarding the flights, I need to see how many stops they have and choose the cities where to have the stops, choose the price range and economy/business class.

Regarding the accommodation, I would like to have specified the number of beds, the utilities (I would prefer a kitchen for example), the distance to the main attractions, etc.

Frustrations

I am a busy person and I usually need to find a place in a very short period of time and have the option to cancel it. Also, I would like to be able to go to a festival for just one day.
